NEW BOOKS

Of the approximately 200 new books received by the Army Medical Library each month a few are being chosen, more or less at random, for brief mention here.

BAUER, JULIUS. *Constitution and disease; applied constitutional pathology.* New York, Grune & Stratton, 1942. 208 p.

A study of the "potential energy of the germ plasm" and its relation to disease throughout the life of the individual, by a former professor of the University of Vienna.

BENNETT, GRANVILLE, A., ET AL. *Changes in the knee joint at various ages.* New York, The Commonwealth Fund, 1942. 97 p. 31 plates.

The results are given of a long-continued investigation of degenerative joint diseases carried on at the Massachusetts General Hospital and supported by the Lovett Memorial Foundation, the Massachusetts Department of Public Health, and the Commonwealth Fund.

GERLING, C.J. *Sight saver.* New York, Harvest House c1943. 202 p.

This is an alphabetically arranged series of brief explanatory articles on various phases of optics, optometry, ophthalmology, eye nostrum and quackery, and eye sight conservation. It is a non-technical guide to the many means available for the protection and correction of vision.

HUXLEY, ALDOUS. *The art of seeing.* New York, Harper, 1942. 273 p.

The art of seeing, like other fundamental psycho-physical skills, can be improved by appropriate techniques. Those developed by W. N. Bates are described in this present volume and correlated with modern psychology and critical philosophy. The author derived benefits from following the procedures of visual re-education and desires to make the "Art of seeing" more widely known to sufferers of defects of vision.

KAFKA, M., MARTYN. *Flying health.* Harrisburg, Pa., Military Service Publishing Co., 1942. 248 p.

Practical advice and knowledge needed by pilots to keep themselves in flying health. The purpose of the book is to call attention to the essential steps in decreasing the high percentage of pilot errors.

MOON, VIRGIL H. *Shock; its dynamics, occurrence, and management.* Philadelphia, Lea & Febiger, 1942. 324 p.

A condensed practical treatise embodying the mechanism, recognition, and means of combatting this type of circulatory failure, which occurs in many conditions other than physical trauma.

WEISS, EDWARD & O. *Spurgeon English. Psychosomatic medicine; the clinical application of psychopathology to general medical problems.* Philadelphia and London, W. B. Saunders Co., 1943. 687 p.

Approaching the study of illness with the inquiry "how much of the problem is emotional and how much is physical", the two authors, distinguished representatives of the fields of clinical medicine and psychiatry respectively, consider a host of disorders, illustrated by case histories, from this integrated point of view.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. MICROFILM COPYING

Army Medical Library
Washington, D.C.

Microfilm copying of the periodical literature of the Army Medical Library was begun by Bibliofilm Service of the U.S. Department of Agriculture in 1936 and continued until September 1940 when an independent service under the auspices of the Friends of the Army Medical Library was established. Due to the expanding needs of microfilm copying for Regular Army and Federal establishments and other calls made upon it in the present emergency, additional equipment and enlarged facilities have been added at public expense. It has now become possible to substitute microfilm copying to a limited extent for interlibrary loans. Microfilms will be sent without charge in lieu of the loan of the books to all accredited medical librarians who prefer them or where books or journals cannot be loaned.

This service should result in a saving for the borrowing librarian since the responsibility for safekeeping and return of the books will be eliminated and no records will be required. The person receiving the microfilm will have no obligation for its return and may retain it for future use.

The total amount of work which can be done on this basis is of course limited by appropriations now available, hence there will be a limitation in the extent of the service, as to quantity. Orders for microfilm copying, except in particular cases, where bulk or commercial work is involved, will not ordinarily be accepted from individuals, but only through libraries, in the same manner as interlibrary loans.

The following postage should be included with each order for microfilm:

Articles totaling up to & including 100 p. send....	1½
" " " " " 400 p. "	3¢
" " over 400 p. send 4 1½¢ stamps...	6¢

Send orders to:
Photoduplication Service
Army Medical Library
Washington, D.C.

NOTE: The above offer refers only to extract copying from periodicals and does not cover making microfilm copies of entire volumes.

Most of the requests which have so far been received have not been accompanied by the postage mentioned above. Since this service replaces interlibrary loans which are not granted the franking privilege the microfilms can not be mailed out without the proper amount of postage.
